Continuation of 5. does NOT place the application in condition for allowance because: Applicant's remarks with respect to claims 1 and 28 fail to overcome the cited Whiteside reference. With respect to claim 1, applicant argues that the reference fails to disclose the second member releasable from the first. It is submitted that the second member is releasable from the first member via screws 65. Since the screws maybe be unscrewed, as opposed to welded thereon, the second member is releasable from the first. With respect to claim 28, applicant argues that the reference fails to teach the wireline attached to the body, which is immaterial to the claim because the claim calls for the wireline to be attached to the tubing.
